SUMMARY

Senior Software Engineer (SD3) with 8.5+ years of hands-on experience in designing, developing, and scaling high-performance web applications and backend systems. Strong expertise in Node.js, React.js, PHP, and modern JavaScript frameworks, with a proven track record of delivering end-to-end solutions across complex, business-critical domains. Experienced in building robust RESTful APIs, integrating third-party services, and optimizing application performance through efficient architecture, caching strategies, and database tuning. Adept at working with microservices-based architectures, asynchronous processing, and event-driven systems to ensure scalability, reliability, and maintainability. Proficient in full-stack development, collaborating closely with product, QA, DevOps, and business stakeholders to translate requirements into high-quality technical solutions. Comfortable owning features from design and implementation to deployment and production support, with a strong focus on clean code, security, and best practices. Demonstrated ability to debug complex production issues, improve system stability, and contribute to architectural decisions in fast-paced environments. Actively involved in code reviews, mentoring junior engineers, and driving engineering standards to improve overall team productivity and code quality. Known for strong problem-solving skills, clear communication, and a results-driven mindset, with experience delivering solutions in fintech / enterprise-scale platforms and supporting mission-critical applications in production.

SKILLS

- ReactJs
- NodeJs
- PHP

EXPERIENCE
